Flexible
Robust
Lightweight

Extra Grip

Lightweight and manageable

- ▶ Up to 50% lighter than conventional aluminium system.
- ▶ No soil or water infiltration.

Strong

- ▶ Takes vehicles up to 45 tonnes.
- ▶ Supports 100 tonnes static load evenly distributed.

Quick and Easy

- ▶ Up to 700 linear metres in 12m (40') container.
- ▶ Rolls into position.
- ▶ Ramps and fixing plates for maximum stability.

Tested by the Defence and Evaluation Research Agency (DERA)
"ROLLAROAD has many advantages over the current generation of in-service trackway systems."
"The trackway performed more than adequately and could easily have facilitated significantly more vehicle traffic if required."
"ROLLAROAD trackway performed well during trials."

SGB (ESL's UK distributor) Event Manager Rita Smith quotes:-
"ROLLAROAD is tough and durable, gives minimal damage, is easy to maintain and brilliant for multiple vehicle access from cars to heavy trucks."
